Global Health Internship Kickoff!

Closed captioning available. We’ll begin shortly.
Wednesday, November 5, 2014
Start time: 11 am Pacific | 2 pm Eastern

USAID’s Global Health Fellows Program is implemented by the Public Health Institute and its partners: Global Health Corps, GlobeMed, Management Systems International and PYXERA Global
Shell Culp

Chief Innovation Officer
Stewards of Change

Shell Culp joined Stewards of Change after more than three decades in California state public service, where she most recently served as the Agency Information Officer for California Health and Human Services Agency. Shell also served as the Interim Director and Chief Deputy Director of the CHHSA Office of Systems Integration, where she oversaw a portfolio of systems integration valued at well over $5 billion. An innovator in government, Shell catalyzed CHHSA into its Open Data movement, and championed Health and Human Services interoperability efforts. Her passion for performance improvement in government also makes her a champion of organizational change management, and she speaks about these topics across the country.

Welcome to our presenters:

Dave Ross  Nirav Shah  Rebecca Coelius
POLL #2

Do you believe data will change how public health works?

a) Yes! We are well on our way!
b) Yes, but the changes won’t be as dramatic as many people think
c) Maybe? The jury is still out
d) It is possible, but unlikely we will have the funding and infrastructure to move the needle enough
e) No, there are too many problems that data won’t answer
f) Other (please submit)
Dr. David Ross is the Director of the Public Health Informatics Institute. He became the Director of All Kids Count; a program of PHII supported by The Robert Wood Johnson Foundation (RWJF), in 2000, and subsequently began PHII, also with funding from RWJF.

Dave's experience spans the private healthcare and public health sectors. Before joining the Task Force, he was an executive with a private health information systems firm, a public health service officer with the Centers for Disease Control and Prevention (CDC) and an executive in a private health system.

POLL #3

Do you collect data about your own personal health, such as fitbit, blood pressure, etc.?

a) Yes, diligently
b) Sometimes, but it doesn’t always happen
c) No, but I have been meaning to start
d) No, should I be doing that?
e) No, and I will not

f) Other (Please submit)
In her role as Esri's health and human services industry manager, Dr. Geraghty explores new ways geography can transform community health and modernize social services. Before joining Esri, Dr. Geraghty was a practicing physician in general internal medicine at the UC Davis Health System. She also served as the deputy director of the Center for Health Statistics and Informatics at the California Department of Health, where she led the launch of the state's first open health data portal.

POLL #4

What do you see as the most important next step in moving public health forward, with respect to using data?

a) Improved training for data resources that already exist
b) More access to specialized data resources for particular causes
c) Better integration of data systems already available
d) A wider understanding of the possibilities, to spark innovation in the general field
e) A wider understanding of the possibilities, to bring more advanced use of data in the workplace
f) Other (please submit)
Rebecca Coelius is a doctor using her background in clinical medicine, policy-making, and social entrepreneurship to advance the health of individuals and local governments through the Code for America Health Focus Area. Prior to joining CfA, Rebecca worked for the Health and Human Services Chief Technology Officer as the Medical Officer for Innovation, and ran the Office of the National Coordinator for Health IT’s Division of Science and Innovation. She has worked for and advised a variety of digital health start up companies, previously Founded and served as Executive Director of the non profit for social entrepreneurship SpanAfrica, and worked in India and Egypt on low tech maternal health interventions.
