- h. Media
- i. Non-profit
- j. Public health
- k. Other

Trust for America's Health (TFAH)

Independent, non-partisan, public health & prevention focus, including:

- Data/research for action
- Health-promoting policies
- Strong public health system
- Informed policymakers

Social Needs vs. Social Determinants

Address Social Determinants

- Policy-level intervention
- Change underlying social & economic conditions of a community
- Adopt laws, policies, and regulations to create healthy living conditions

Address Social Needs

- Individual-level intervention
- Address the need of individual people or patients
- Screen for social factors and connect to direct support or services

What is the Promoting Health and Cost Control in States (PHACCS) Initiative?

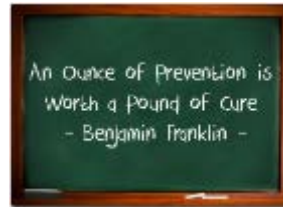

- Focuses on state-level policies that promote health and control cost growth
- Looks beyond health care in an effort to foster cross-sector collaboration, recognizing impacts in other sectors can improve health

Criteria for Policy Recommendations

Sufficient health and economic evidence

Form of prevention

State-level policy role

Population focused

Goals & Related Policies

Promoting Health and Cost Control in States:

How States Can Improve Community Health & Well-being Through Policy Change

Goal 1: Support the Connections Between Health & Learning

Goal 6: Create Opportunities for Economic Well-Being

10. Earned Income Tax Credit
11. Paid Family Leave
12. Earned Sick Leave
13. Ban the Box (Fair Hiring Protections)

Tobacco Pricing Strategies

Policy

- Revenue generated from taxing tobacco products may be used to fund tobacco control interventions

Impact

- Every year, smoking-related illnesses costs the U.S. more than \$300 billion
- States can generate cost savings in the form of lower healthcare expenditures by increasing tobacco prices
- Higher prices decrease tobacco consumption and increase rates of tobacco cessation
